• This a study conducted using Struvite Remover STSR on the outer shell of a centrifuge.

• In this study, they want to remove the deposits and keep the buildup soft and easy to remove. Using Struvite Remover STSR in a Hudson spray daily they were able to keep the centrifuge clean.
Initial before Remover application
After 1 application
After 2 applications
After 3 applications
Before Use of Struvite Remover
Before Use
of Struvite Remover

Final after 10 days
of once daily
application of
Struvite Remover
Before Use Of Struvite Remover

Only 3 gallons used! Each rinse/scrub took approximately 15 minutes
Conclusion

– Environmentally friendly
– Safe to handle
– Reduced odors in area
– Only required 15 minute application per day
– Use Struvite Remover daily as a maintenance package to effectively remove scale buildup from centrifuge
